

NEXON ABSOLUTE
CONNECT. COMMUNICATE.
COLLABORATE.

At Nexon, we understand the role Unified Communications (UC) needs to play in making your organisation a more connected place, the kind of environment where people can be more productive, efficient, responsive and collaborative. Nexon understands that your UC solution will touch every area of your business – from the network infrastructure to the employee's desktop or mobile environment, and everything in between.

It's this promise of end-to-end collaboration that makes UC such a game-changer for organisations, which is why you need Nexon Absolute to help you unleash its full potential.

NEXON ABSOLUTE: DELIVERING THE PROMISED RESULTS

Nexon Absolute is a cloud based unified communications (UC) solution that allows businesses to experience the full potential of Skype for Business. It can be rapidly deployed via Nexon's hosted platforms, and cost effectively delivered via our pay-per-user service.

Nexon Absolute replaces your standard PBX system, while combining and integrating all your communication capabilities on a single, easy to use platform – voice mail, video, audio, web conferencing, instant messaging and desktop sharing environments. In combination with Office 365, Nexon Absolute gives you access to features, like voicemail to email, to ensure your people never miss a beat.

- **1 WE'VE DONE THE RESEARCH FOR YOU**

Whether you are looking to replace or enhance current PBX with next gen features, create a more mobile workforce or looking to consolidate conferencing solutions, Nexon has done the research for you. Skype for Business provides more freedom, flexibility and control in the way businesses interact and collaborate from any location, on any device.
- **2 WE HAVE THE EXPERIENCE**

Nexon is one of the few business technology providers that can combine its technical expertise across all ICT segments with a real understanding of Microsoft Skype for Business. We can develop a UC strategy that integrates your network, telephony, desktop, server, applications and mobile environments, ensuring the proposed Skype for Business platform seamlessly extends your existing IT environment.
- **3 DEVELOPED TO BE USED**

We understand that a successful Skype for Business integration must incorporate the needs of your users as well as your organisation's processes. This is why, we ensure the solution is not only properly delivered, but then properly used by your people. Nexon Absolute has a strong focus on project management and end user training, featuring user-friendly transition modules, and migration and support strategies.
- **4 WE KNOW HOW TO GET YOU THERE**

Nexon has the expertise and Project Management resources to ensure that the planned rollout of your Skype for Business platform is completed on time and with minimum risk. We use a tried and proven methodology based on the international industry standard such as PRINCE2, which can be applied to any project regardless of size, type of organisation or organizational culture. Our methodology provides a consistent and secure approach to project management giving you the confidence that your investment is maximised and your project is successful.
- **5 EVOLVE AS YOU GROW**

Nexon's implementation of Skype for Business will transform your organisation, moving it away from restrictive traditional communication systems to one that truly streamlines all the different channels of communication your business accesses on daily basis. Our holistic approach means that we can also give you access to Nexon's hosted Skype for Business solutions and its "per seat per month" plan, meaning you only pay for rolling out Microsoft Skype for Business where it makes sense.

To find out how Nexon Absolute ensures Skype for Business does exactly what you need it to, call us at **1300 800 000**, email us at enquiries@nexon.com.au or visit nexonabsolute.com.au
